

DEA 230 + 231 – Implementation I and II

So for this semester the emphasis is on TEAMWORK...and creating something from start to finish. You all will be working together one way or the other to get a feel for how your classmates are your teammates. The maximum number should be 5 people per team based on the project. Its not based on number of assignments completed but it will be based on the quality of the assignment of your choice.

Be it a commercial, a short film, a music video, the power of imagination and technology is in your hands and its your chance to show off this power over the course of this semester. You will check in with the professor every two weeks to get a critique. But the twist is that at the end of each month you will all submit a word doc featuring a critique over your teammates. Be direct, give examples, and explain if they were helpful and how.

The point of this exercise is to prepare you all for similar working conditions in the real world, how you must depend on teammates to accomplish their task so you can complete yours. Think of it as the warm up for graduation as you implement your skills into whatever assignment comes to mind.

Grades will be based solely on quality of work and how you're reviewed with your peers.
