

ACM SIGGRAPH IRC

International Resources Committee

INTERNATIONAL CONNECTION

Throughout the year, the International Resources program facilitates worldwide collaboration in the ACM SIGGRAPH community. Because of our international connections and close relationship to the international ACM SIGGRAPH Chapters, we are often able to connect people and resources across the world. Please contact us if you are interested in connecting with ACM SIGGRAPH Chapters and/or professionals in the field of graphics and interactive techniques.

For SIGGRAPH2012 conference, we have prepared this document, which highlights all conference submissions and presentations from Latin America. If you have questions about this list, please contact our 'Latin America' committee members:

Marilenis Olivera [marilenis@gmail.com]
