Course Requirements

1) Project / Body of Work – This is an advanced studio class with emphasis on honing one’s visual language through the creation of new work. Students are required to write a proposal for the body of work they wish to focus on during this semester. The initial proposal is due on Feb. 8th and students are encouraged to revise that proposal throughout the semester as their work progresses. Students must have new, original work for each of their critique sessions. Students will also be required to write one artist statement, which will also be refined over the course. Drafts of student artist statements will be due every critique day of that student’s work with the final version due on May 9th & 16th.
