

**Modeling Portfolio Art Test:**

Recreate the scene provided. The geometry, scale and visual accuracy will be looked at to ensure a professional level of accuracy for a modeler in their discipline. No materials are asked for. The final turned in should include a minimum of three images of wire frames and single-color shaded images.

Geometry should be appropriate for your chosen field. Triangle or quad based polygons for entertainment modelers. Modelers moving into other fields will need to meet with faculty to discuss other options.

The final turn in beauty shot should match the image, same angle and content. The wire frames can and should show off interesting individual pieces and a zoo shot is encouraged.
